

What our students say

"The Indigenous Community-Based Master of Education Program has allowed me and my classmates the space to examine not only teaching and learning but the education system as a whole. The classes and professors promote deep thinking about how best to create changes to this system to ensure success for all students and challenge the idea of what education truly is. This program is not about competition, grades, or individual achievement but about supporting and challenging one another to change our perspectives and change education."
