- Rights and Responsibilities
- SCOT
- WHIMIS 2015
- MEWP certificate
- Fall Protection
- Confined Space

Scan to see eligibility requirements

Heat and Frost Insulators install and maintain insulation and cladding on mechanical systems, like pipes, ducts, and tanks to control temperature, prevent energy loss, and protect workers and equipment. From commercial buildings to industrial sites, insulators play a key role in safety, efficiency, and environmental protection. It's hands on, high impact work that demands skill, precision, and pride.
